

SEVERE WEATHER WARNING SYSTEM

FOR MONCKS CORNER REGIONAL RECREATION COMPLEX AND YOUTH FIELD COMPLEX

(Implemented on August 24, 2010)

The Moncks Corner Recreation Department has implemented a system to notify you of dangerous weather conditions for all activities at the Moncks Corner Recreation Complex and Youth Field Complex.

When you hear the sound of an air horn being blown by the Recreation Staff Supervisor, all players, parents, coaches and game officials should **IMMEDIATELY** go to their vehicles. **Do not hesitate** in getting away from the field area. Do not sit in dugouts, under trees or stand around the concession stand area.

In the event of lightning in the area, you may not come back to practice/game until **30 minutes after the last lightning flash**. The Supervisor will blow the air horn again to give you the ALL CLEAR signal to come back to practice/game (if time allows).

Thank you for helping keep our participants and families safe.
